The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Nystrom et al (US006526091B1).

Regarding claim(s) 1, 4 and 7, Nystrom discloses a method and apparatus for synchronizing a secondary (120) (Fig 2) station with a primary station (110), the primary station and the secondary station exchanging CDMA signals via a communication medium (see abstract, Fig 4, col 3 lines14-20 col 4 line 67), the method comprising the steps of:

-modulating (810) (Fig 8) a data signal with an initial code word in order to obtain an initial CDMA signal and transmitting the initial CDMA signal to the primary station until synchronization with the primary station is obtained (see Fig 8, col 15 lines 1-20, the initial code word or the Hadamard code word is generated via the 804 hadamard sequence generator, and passed thru the selector and into the modulator 810 that than produces the signal for transmission, synchronization for the initial code word is accomplished by primary synchronization code (PSC) see Fig 4 col 6 lines 8-15),

Application/Control Number: 09/763,843

Art Unit: 2664

Page 3

- modulating the data signal with a final code word in order to obtain a final CDMA signal and transmitting the final CDMA signal after synchronization with the primary station has been obtained, characterized in that the initial code word is substantially orthogonal to the final code word for every possible time shift of the initial code word (see Figs 3-5, col 6 lines 37-50, col 6 lines 63 – col 7 line 27, the modulated signal with final code word is substantially orthogonal to the initial code word for every possible time shift using coherent combination for all possible code words see specifically col 7 lines 19-25).

Regarding claim(s) 2, 5 and 8, Nystrom discloses a method of synchronizing a secondary station with a primary station wherein all symbol values of the initial code word are equal to each other (see col 10 lines 63- col 11 lines 18, all initial symbol values are equal for an given matrix with i=j sequences as shown).

Regarding claim(s) 3, 6 and 9, Nystrom discloses the use of Walsh-Hadamard codes (see col 4 lines 21-30), and the initial code word is first row or first column (see col 11 line 19-25).

Response to Arguments

Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2664

Conclusion

Page 4

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raj Jain whose telephone number is 571-272-3145.

The examiner can normally be reached on M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin can be reached on 571-272-3134. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9306 for regular communications and (703) 872-9306 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-

2600.
